The Proclamation of the Ukrainian National Committee of Geographers

Ukrainian National Committee of Geographers resents Oxford University Press 2016 edition of Oxford Atlas of the World, mentioning Crimea as Russian territory, as well as French Larousse edition of the same kind.

Crimea is an integral part of Ukraine, illegitimately annexed by Russian Federation in 2014. Annexation of Crimea was denounced by UN General Assembly, Parliamentary Assembly of the Council of Europe, OSCE PA and by Ukraine herself.

We appeal to international community of geographers to prevent apocryphal data spreading around the globe, infringing Ukraine's claims for Crimea, which had been repeatedly proved by international community of nations.

On behalf of Ukrainian National Committee of Geographers,

Head of National Committee
Professor Leonid Rudenko
